

# TOTAL TRAINING™ FOR ADOBE® PREMIERE® PRO 2

## QUICK REFERENCE GUIDE

### Part 1 – A Tour of Premiere Pro

1. GETTING STARTED 39:00  
Exploring New Project Presets  
Customizing Presets & Modifying Project Settings  
Loading, Saving & Arranging Workspaces  
Tricks for Customizing Your Workspace  
General Preferences  
Audio & Auto Save Preferences  
Capture, Device Control & Label Preferences  
Media & Scratch Disk Preferences  
Titler, Trim & User Interface Preferences  
Customizing Keyboard Shortcuts

2. THE PROJECT PANEL 22:58  
Importing Media into a Project  
An Overview of the Project Panel  
Importing Still Images  
Organizing Media in the Project Panel  
Exploring the Project Panel Wing Menu  
Using the Edit Columns Feature

3. THE SOURCE MONITOR 27:20  
Introducing the Source Monitor  
Assigning In & Out Points  
Working with Subclips  
Working with Audio in the Source Monitor  
Editing Audio & Video Clips  
Display Options & the Wing Menu  
Creating & Nesting Sequences

4. THE PROGRAM MONITOR 29:31  
Introducing the Program Monitor  
Making a 3-Point Edit  
Setting Markers & Using the Transport Controls  
Looping, Title Safe & Output Options  
Exploring Realtime Playback & Export Settings  
Choosing a 24p Conversion Method  
Choosing a Desktop Display Mode  
Making Lift & Extract Edits  
Accessing the Trim Monitor  
Exploring the Program Monitor Wing Menu

5. SEQUENCES & THE TIMELINE PANEL 36:22  
Modifying the Default Sequence Settings  
Creating a New Sequence  
Adding & Deleting Tracks in the Timeline  
Changing the Track Display in the Timeline Panel  
Inside the Track Header  
Keyframing Opacity & Volume  
Show Keyframes Settings  
Setting Target Tracks for Video & Audio  
Working in the Timecode Control Area & Snapping  
Setting Markers for DVD Authoring & Editing  
Final Comments

### Part 2 – Working with DV

1. SET UP FOR DV & EXPORT TO TAPE 21:37  
Creating the Export to Tape Project  
Reviewing DV Playback & Project Settings  
Troubleshooting Device Control Issues  
Laying Down Color Bars  
Assigning a Preview File Storage Location  
Using the Export to Tape Dialog Box

### Part 2 – Cont'd

1. THE CAPTURE PANEL 35:35  
Setting up for Capture  
Setting Device Control Preferences  
Setting up Your Scratch Disks  
Using the Capture Panel Transport Controls  
Exploring the Logging & Settings Tabs  
Logging & Naming Clips  
Working with Offline Files & Batch Capturing

2. TIMELINE EDITING BASICS 36:06  
Starting a Rough Cut Edit  
Refining a Sequence in the Timeline Panel  
Overlaying versus Inserting Shots  
Using Pick-up Shots  
Using the Roll & Slip Edit Tools  
Using the Match Frame Feature

3. EFFECTS & TRANSITION BASICS 24:30  
Saving an Effects Workspace  
Getting around the Effects Panel  
Fading up the Opacity of a Clip Using Keyframes  
Applying a Default Transition in the Timeline  
Modifying the Properties of a Video Transition  
Adjusting the Alignment of a Transition  
Adding Transitions to the Rest of the Scene

4. USING THE PROJECT MANAGER 11:04  
Creating a Matte Letterbox  
Creating a Nested Sequence  
Adding a Counting Leader & Exporting to Tape  
Working with the Project Manager  
Final Comments

### Part 3 – Title Designer Fundamentals

1. TITLE DESIGNER BASICS 23:37  
Creating a Workspace for Titling  
Introducing the Titler Panel  
Exploring the Tools Panel  
Exploring Titler Styles & Properties  
Working with Basic Text Attributes  
Importing a Graphic Element into a Title

2. TITLES: OBJECT & TEXT STYLES 28:22  
Creating & Distorting an Object  
Adjusting the Fill & Sheen Properties  
Adding Stokes to Create Depth  
Creating & Applying a New Style  
Creating a New Text Style  
Integrating Text with Objects  
Saving & Using Templates

3. TITLES: TEMPLATES 19:38  
Accessing the Title Templates  
Customizing a Title Texture Fill  
Customizing Title Color & Gradient  
Importing a Logo to Save as a Bug Template  
Working with Widescreen Templates  
Modifying an HDV Title Template

### Part 3– Cont'd

4. TITLES: CUSTOM CREDIT ROLL 20:17  
Setting up a New Title Roll  
Setting up Custom Tab Stops in a Title Crawl  
Creating, Formatting & Duplicating Text  
Adjusting Credit Roll Playback  
Saving Your Credit Roll & Creating a Template  
Final Comments & Credits

### Part 4 – Creating a Photo Montage: Motion, Effects & Audio

1. STILL IMAGE BASICS 25:10  
Setting up a Still Image Project  
Setting Still Image Prefs & Importing Still Images  
Sorting Imported Stills & Scaling to Frame Size  
Using Icon View & Automate to Sequence  
Automating to a Sequence in Selection Order  
Creating a Background for a Still Image Montage

2. WORKING WITH LAYERED PSD FILES 16:09  
Importing Layered Photoshop Files  
Sequences, Settings & Workspaces  
Nesting Photoshop Layers into Sequences

3. USING THE EFFECT CONTROLS PANEL 22:49  
Basic Keyframing in the Effect Controls Panel  
Applying a Bezier Curve to Keyframes  
Copying & Pasting Motion & Opacity Keyframes  
Adjusting the Timing of Opacity Keyframes  
Copying & Pasting Effects  
Adjusting the Timing for Opacity & Scale

4. MOTION BASICS 35:05  
Importing Still Images & Creating Sequences  
Using the Automate to Sequence Command  
Adding Motion to Stills  
Creating & Modifying a Custom Effects Preset  
Understanding Keyframes & Keyframe Interpolation  
Modifying Presets  
Adding Rotation & the Anti-flicker Filter  
Working with Continuous Bezier Curves  
Organizing Custom Presets

5. ASSEMBLING YOUR MASTER SEQUENCE 19:21  
Importing Audio Files  
Preparing Sequences to be Nested  
Nesting Sequences in a Master Sequence  
Cross Dissolving from One Sequence to Another  
Dipping to Black Between Two Sequences

6. EXPORTING TO DVD 20:45  
Creating a DVD Layout from a Template  
Adding DVD Markers for Navigation  
Customizing Menus with Backgrounds & Music  
Adding an Additional Menu Title & Stop Markers  
Exporting to DVD  
Final Comments

# TOTAL TRAINING™ FOR ADOBE® PREMIERE® PRO 2

## QUICK REFERENCE GUIDE

### Part 5 – Workflow: Ocean Futures

#### 1. PROJECT OVERVIEW & V.O. RECORDING 23:04

Reviewing Scripts & Creating Media Bins  
Setting Audio Preferences  
Setting up the Audio Mixer for Recording  
Recording a Voice Over  
Importing Media with Bridge

#### 2. AUDIO EDITING & BUILDING YOUR CUT 43:16

Reviewing the Treatment & Adjusting Clip Gain  
Editing Audio from Source Monitor into Timeline  
Timeline Editing Techniques  
Refining the Voice Over Track  
Using the Pen Tool to Remove Unwanted Audio  
Adding Video & Using Source Channel Mapping  
Techniques for Aligning Video Edits with Audio

#### 3. BUILDING A CUSTOM EFFECT SEQUENCE 35:27

Building a Custom Sequence Housing 4 Clips  
Separating the Frame into Quadrants  
Changing the Size & Position of Clips  
Slip Editing Shots to Adjust the Action  
Creating a Custom Fade  
Creating a Custom Lower Third Animation  
Building a Title Sequence with Text & Video  
Creating a Film Strip Effect Sequence

#### 4. FINE TUNING & QUICK FIXES 29:30

Refining Edits with the Editing Tools  
Locking the Video Tracks & Finishing the Edit  
Enhancing Video with Auto Color & Auto Contrast  
Using the Fast Color Corrector  
Matching the Color of One Shot to Another  
Resizing Clips with the Scale & Crop Tools

#### 5. AUDIO FINISHING 28:25

Export Movie Settings & Rendering Video Previews  
Audio Workspaces & Effect Controls  
Introducing the EQ Effect  
Applying the EQ Effect with the Audio Mixer  
Adding Music to the Mix  
Adjusting the Music in the Audio Mixer  
Setting Custom Audio Fades

#### 6. CONSOLIDATING & EXPORTING 21:35

Consolidating a Project with the Project Manager  
Making Basic Adjustments with the Media Encoder  
In-Depth Look at Encoding Settings  
Creating Custom Encoding Presets  
Encoding Video & Audio for Macromedia® Flash®  
Final Comments

### Part 6 – Advanced Techniques

#### 1. ADVANCED EDITING TECHNIQUES 22:55

Playing Video in Reverse  
Creating a Seamless Edit between Shots  
Using the Trim Panel to Refine a Video Edit  
Changing Shot Order & Adjusting Linked Audio  
Shifting Video with the Slip Tool  
Matching Movement between Shots via Trimming  
Fading Video to a Color Matte

### Part 6 – Cont'd

#### 2. ADVANCED COLOR CORRECTION 25:45

Performing a Three-Way Color Correction  
Video Levels & Output Options  
Correcting the Black, Gray & White Balance  
Adjusting the Tonal Range  
Performing a Secondary Color Correction  
Adjusting Hue, Saturation & Luma  
Using the Video Limiter

#### 3. BUILDING A MULTI-TRACK MIX 22:47

Adding Additional Audio Tracks  
Working with Submix Tracks & the Audio Mixer  
Adding & Adjusting Reverb  
Using the Render and Replace Command  
Layering Sound Effects in the Timeline  
Raising the Master Volume of the Sound Effect Tracks

#### 4. 5.1 SURROUND SOUND MIXING 29:25

Converting a Mono or Stereo Mix to 5.1 Surround  
Inside the 5.1 VU Meters & Audio Mixer  
Dynamically Adjusting the Pan Using Latch Mode  
Panning with the Touch & Write Modes  
Panning an Audio Effect to the Right  
Boosting Low Frequency by Raising the LFE  
Setting Audio Output Mapping Preferences  
Outputting with the Media Encoder  
Final Comments & Credits

### Part 7 – What's New in Premiere Pro 2

#### 1. OVERVIEW OF WHAT'S NEW 46:17

Introducing the New Project Presets  
Looking at New Project Settings  
Using Adobe Bridge  
Testing Out New General Preferences  
New Audio, Capture & Device Control Preferences  
Conforming Audio & Using a Media Cache Database  
Timecode Display, Media Offset & Scratch Disks  
Using the Timecode Effect & Creating a Guide Track  
Source Channel Mappings  
Edit in Adobe Audition(TM) & Adobe Dynamic Link

#### 2. INTERFACE & WORKSPACE REVISIONS 17:10

Arranging Panes & Panels for Audio Mixing  
Creating a Color Correction Workspace  
Incorporating the Titler into Your Workspace  
Toggling Between Different Workspaces

#### 3. WORKING WITH HDV 34:18

HDV Project & Capture Settings  
Working in the Timeline with HDV Footage  
Using the Eight-Point Garbage Matte Effect  
Using the Three-Way Color Corrector  
Importing Your Sequence into an HD/SDI Project  
Exporting Your HDV Project  
Working With HDV in Widescreen  
Laying Back an HDV Sequence to a DV Tape

### Part 7– Cont'd

#### 4. NATIVE SD & HD/SDI SUPPORT 23:59

Custom Settings for SD/SDI  
Data Rates, Playback & Rendering for SD/SDI  
Customizing Settings for HD/SDI  
Data Rates, Playback & Rendering for HD/SDI  
Capturing Video & Device Control

#### 5. THE NEW MULTI-CAM WORKFLOW 26:11

Introducing Multi-Cam  
Using Markers & Synchronizing Clips  
Multi-Cam Editing  
Multi-Cam Recording  
Synchronizing Clips with Numbered Markers  
Synchronizing & Recording Clips with Timecode  
Adjusting the Timecode Value to Create a Sync Point

#### 6. THE NEW COLOR CORRECTION TOOLS 34:56

Getting Ready for Color Correction  
White Balancing with the Fast Color Corrector  
Using the Luma Corrector  
Using the Video Limiter  
Using the Luma & Primary Fast Color Correctors  
Track Mattes & the New Color Correction Tools  
Radial Track Mattes & Color Correction Techniques

#### 7. THREE-WAY & SECONDARY COLOR CORRECTION 29:35

Introducing the Three-Way Color Corrector Effect  
Setting Up for Three-Way Color Correction  
White Balance & Three-Way Hue Balance and Angle  
Defining Shadow, Midtone & Highlight Tonal Ranges  
Adjusting Black, Gray & White Input/Output Levels  
Defining a Secondary Color Correction Range  
Adjusting Secondary Hue, Saturation & Luma  
Softening a Selection & Adjusting Midtones  
Applying a Second Secondary Color Correction  
Effects Stacking Order & Color Correction Tips

#### 8. USING CLIP NOTES 16:36

Exporting a Sequence for Clip Notes  
Viewing Sequences & Adding Comments in Clip Notes  
Adding Markers & Exporting an Embedded Comment

#### 9. CUSTOM DVD AUTHORIZING 35:19

Introducing DVD Layouts & Templates  
Setting Scene Selection Markers  
Modifying Scene Selection Buttons & Previewing  
Creating a Custom Menu Background  
Adding Audio to a Menu  
Adding a Credits Link to the Main Menu  
Modifying DVD Menu Elements  
Exploring Burn DVD & Export Settings  
Final Comments & Credits
